**Dublin attracts Ohio Orthopedic Center of Excellence:
Opens first satellite office**

October 23, 2007:

Ohio Orthopedic Center of Excellence is preparing to open its first satellite office featuring the full scope of orthopedic surgeons and specialists along with physician directed physical and occupational therapy. Positioned at 6840 Perimeter Drive, the new location is intended to offer patients another level of convenience situated just across the street from the new state of the art Dublin Methodist Hospital. Opening on November 12th with over 9,000 square feet and convenient access in the heart of this new booming section of Dublin, Ohio Orthopedic Center of Excellence looks forward to serving patients in the community with the best orthopedic care in the areas of: Total Joint Replacement, Sports Medicine, Foot and Ankle, Spine, and Physiatry.

Tim Smith, COO of Ohio Orthopedic Center of Excellence adds, “We’re excited about our new location right in the heart of this developing medical campus. Patients will find us easy to access without the struggle of the city traffic. Referring physicians will finally have the option they need for musculoskeletal specialty care in the Northwest suburbs. With x-ray and physical therapy on-site, and the new hospital right across the street, we think this facility is going to add local convenience to the world class care at Ohio Orthopedic Center of Excellence.”

To schedule an appointment, patients are directed to the main number 614-827-8700 and will be given the option to visit either location for physician or physical therapy visit.

About the Ohio Orthopedic Center of Excellence

The Ohio Orthopedic Center of Excellence is Columbus’ destination for orthopedic specialty care, outpatient surgery and physical therapy. With two locations: Upper Arlington and Dublin, Physicians of the Ohio Orthopedic Center of Excellence offer patients the full continuum of quality orthopedic care including: sports medicine and arthroscopy; foot and ankle care; surgical and no-surgical spine care, pain management and electrodiagnostic testing; joint replacement and complete arthritis care; computerized MRI and X-ray; physical therapy and athletic training; and outpatient orthopedic surgery. The Center strives to provide seamless orthopedic surgical care, allowing patients to see their physician, receive surgical care and undergo physical therapy all in one state-of-the-art facility.
